

Patent Marking

The 3dsoundstage.com portal is covered by:

Patent: US 11,240,621 B2

Patent: US 9,131,305 B2

and other pending applications and continuations in the US and elsewhere.

China pending patent application no: 2021105856259

Licensing

3D Soundstage™ is the software and system invented and developed by Li Creative Technologies, Inc. (LCT). The 3D Soundstage™ system has several software packages to support mono, stereo to soundstage audio convention in real time on any device. The software uses the processors available on local devices, such as in-vehicle sound systems, smartphones, smart speakers, TVs, sound bars, laptops, home sound systems, theater sound systems, etc. Listeners can perceive soundstage music using any headphones, earphones, or earbuds or sound system with two or more speakers.

For our perspective business customers who are interested in the technology and software in your applications, services, or products, please email us at admin@licreative.com. Please send from your business email address and explain your applications briefly. We will get back to you as soon as possible.
